

Veteran Support Resources Georgetown & Central Texas

Southwestern Counseling Center

The Counseling Center provides a safe, supportive space for veterans and dependents to focus on their mental health and overall well-being. *Licensed counselors* offer confidential individual therapy, workshops, and resources to help students manage stress, grief, relationships, and academic pressures. In addition, our *Social Work Case Management Services* connect students with resources both on and off campus, including medical care, financial assistance, housing support, and community programs. Case management ensures that students have ongoing guidance and advocacy while navigating challenges that may affect their success.

 Southwestern University
